

Connecting employees to the Right Care!

Medical Employee Benefit Programme

Dear Employer,

Are you looking for a meaningful solution to the health challenges facing your employees and your company?

At Royal Doctors, we understand the complexity of today's healthcare landscape and can offer your employees rapid access to the right care.

Isn't it time for you as an employer to gain more control over (long-term) absenteeism within your organisation and support your employees with our Medical Employee Benefits?

With our Royal Doctors Medical Employee Benefits, we guarantee you and your employees immediate access (within 10 days) to the right care at any time in their lives.

Offering Royal Doctors Medical Employee Benefits shows that you take your employees' health seriously and are willing to invest in it too.

By taking a proactive approach, you demonstrate decisiveness as an employer and commit to ensuring your employees rapid access to the right care.

You can be confident that our service will quickly pay for itself – because you know better than anyone how much an absent employee costs every day.

Our three services within the Medical Employee Benefit programme:

- 1. First Opinion Consult:** Enable your employees to make confident decisions about their health through direct access to the right specialists. A consultation with the right specialist within 10 days every time.
- 2. Second Opinion Service:** Sometimes a second perspective on the correct diagnosis and/or treatment is needed. Our experts give prompt and expert advice, while maintaining the relationship with your current doctor. Dispel your employees' doubts.
- 3. Complex Care Solutions:** For employees dealing with complex medical conditions, our specialist support helps ensure a faster return to the workplace.

First Opinion Consult

Who it's for:

For anyone who has gone to the doctor with a problem and been referred to a medical specialist.

What:

Fast-track access to the right care provider (medical specialist):
a guaranteed consultation with the right specialist
within 10 working days.

Impact:

Quick access to the right care means far fewer days off work.

Second Opinion Service

Who it's for:

For anyone who has been to a medical specialist, received a diagnosis and treatment plan and is unsure if it's the right approach or if there are alternatives.

What:

One of our doctors reviews your diagnosis and treatment plan and answers the questions you have about it.

Impact:

Removal of doubt and anxiety. Avoidance of pointless care, higher quality of care provision.

Complex Care Solutions

Who it's for:

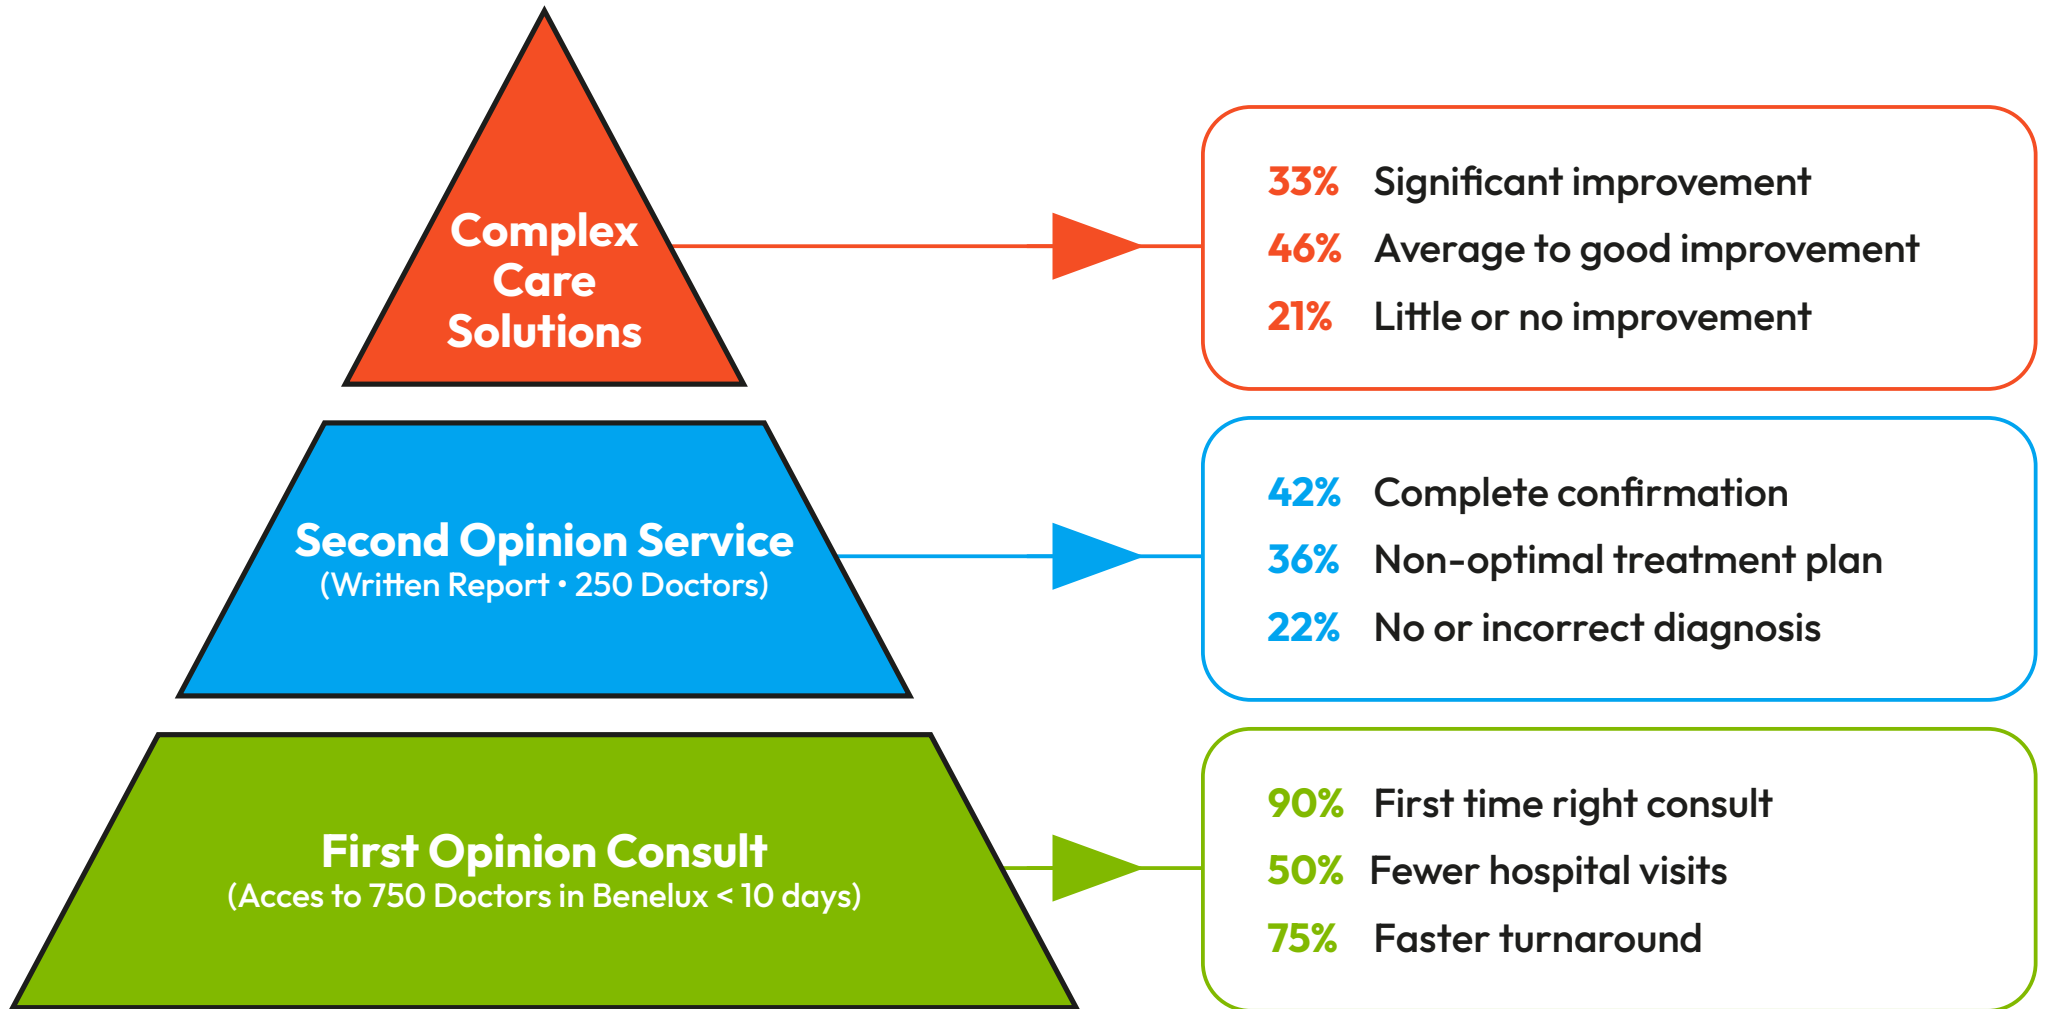

For anyone who has already seen various specialists, undergone various treatments/therapies and is still not free from medical complaints.

What:

A thorough analysis of your medical situation and history in which our doctors look for possible improvements or solutions.

Impact:

From despair and hopelessness to a solution and future prospects.

Advantages for your employees

- ✓ Quick access to the right care
- ✓ Your guide in a complex medical world
- ✓ Peace of mind and extra security. Elimination of doubt

Advantages for the employer

- ✓ Fewer days off work, lower absenteeism costs
